

EMPLOYEE LIFECYCLE AUDIT

Beyondboarding™ begins by identifying your **PEOPLE PAIN** by conducting the Employee Lifecycle Audit. The Audit is a diagnostic evaluation that identifies how people move through the employee lifecycle. It assesses the entire relationship to uncover where that relationship can be strengthened. That means taking a hard look at systems, processes and development initiatives to devise a plan to address what's not working through our **beyondboarding™** solutions.

DELIVERABLE: Along with the actual results, The Audit Report lays out strategic priorities, recommendations, and solutions to address people pain issues.

Key areas of focus in the Audit Report include:

- Culture messaging
- Handoff from acquisition to internal HR
- Orientation practices
- Job-specific needs
- Culture knowledge
- Employee growth and development initiatives
